Medical Affairs Manager Req ID- WD36192

The Medical Affairs Manager will develop and implement medical affairs activities within specified therapeutic areas in alignment with company objectives. He/she should be the expert in the designated therapeutic area, know the disease prognosis, impact on patient lives and the typical treatment pathways. The job holder will interact with Healthcare Professionals to provide information about products and disease areas, seek insight, identify unmet medical needs and address educational gaps. He/she should exercise Medical Governance to provide quality medical support services, scientific knowledge and strategic input to meet the company's operations needs. The job holder will translate complex science into impactful communications that are tailored for the audience and articulates the value of our products clearly and concisely.

Qualifications:

- Medical Degree (Physician) with a strong academic background and minimum 5 years of post graduation experience.
- Solid clinical experience with the ability to rapidly assimilate specific and detailed knowledge in related areas.
- Good knowledge of drug development process, codes of practice and the local regulations.
- Excellent interpersonal, communications and presentation skills with the ability to present and communicate evidence-based data in meetings.
- Ability to manage relationships with internal and external partners.
- Excellent command of the English Language.
- Post graduate degree is in an advantage.
- Experience in Pharmaceutical industry is a plus.

Medical Scientific Liaison (MSL) - Req ID -WD36193

MSL is the field-based medical expert who acts as the interface between professional healthcare community and the internal teams. The job holder will be responsible of engaging with healthcare professionals to provide scientific and medical information in compliance with local policies and procedures. He/she will respond compliantly to unsolicited information requests from healthcare professionals and disseminate important safety information to the healthcare professionals.

Qualifications:

- Medical Degree (Physician) with a strong academic background with 3-5 years of post graduation. Experience.
- Clinical experience with knowledge of drug development process.
- Strong communication skills both verbal and written.
- Strong presentation skills and interpersonal skills with experience in evaluating and effectively communicating evidence based medicine.
- Excellent command of English Language.
- Post graduate degree is in an advantage.
- Experience in the Pharmaceutical industry is a plus.

If you have a medical degree and a strategic mind, you should make GSK your next destination. That's because, with our enviable pipeline of products and global reach, you will have more opportunities to take your career further here than anywhere else. What's more, you'll be surrounded by inspiring colleagues and have the opportunity to work cross-functionally with other areas of our business.
