WHO agrees 3rd cholera vaccine producer

GENEVA – A third producer of oral cholera vaccine has been approved that is expected to provide 3 million doses in 2016, the World Health Organisation (WHO) said on Friday, doubling the world's stock pile against a disease that can kill within hours.

EuBiologics, a South Korea-based producer, joins Shantha Biotechnics of Sanofi Pasteur as a pre-qualified supplier, WHO expert Stephen Martin told a news briefing.

The third producer, which currently does not have doses in the stockpile, is Sweden's Crucell, he said.
