PRESS CLIPPING SHEET

Free-of-charge healthcare: Constitutional right forbidden by government

By Menan Khater

Nearly a month has passed since the infamous assault on the Matariya Teaching Hospital doctors by low-ranking policemen are still walking free, while doctors have resumed work - with the additional burden of providing free-of-charge medical care without government support.

In-focus

medical care without government support. The assault sparked outrage among doctors across hospitals nationvide. Thousandi gathered in a general as-sembly held at the Doctors Syndicate indi-February and voted on a set of decisions, including providing free healthcare for further examinations and medications, with the exception of the fee for the mandatory ticket paid for initial beck-ups. As soon as the decision care intro free, conflicts emerged between the Hinistry of Health, hospital adminis-trators, and the Doctors' Syndicate over the legality of the decision and

over the legality of the decision and practical risks of implementing it. Daily News Egypt visited a group of public hospitals that are included

in the plan to implement the decision. where major discrepancies were dis-covered regarding the rates at which the free healthcare plan is implemented, due to administrative threats. The sizeable Matariya Teaching Hospital is a vital healthcare facility for

nts, not only for those who live in the Matariya suburb but also for citi zens in other nearby neighbourhoods. Hundreds visit the clinics every day.

Hundreds visit the clinics every day, while the hospital is still strugging to dily implement the syndicate's deci-sion. It is an educational hospital that fills under the supervision of the Tacking Hospitals Authority. Momen Abdelazeen, a maillofa-cial surgeon at the hospital and one of the doctors who were subject to the sassult told Daily News Expertua-inglementing this decision is an uphila tatte. "Anyone working in the hospital batte. "Anyone working in the hospital tockets or those who do the x-rays are all technicians and they need their share from the money, from the pa-tients."

According to Abdelazeem, the total revenues from examinations conducted in the maxillofacial de-partment alone can reach up to EGP 20,000 each day. However none of those funds are given to doctors. "We get our salaries two months later than its scheduled date." he said. Matariya doctors have moreover

been confronted by their managers since they initiated the decision, ac cording to Abdelazeem. "If you did not back off we will fire you." Those were the managers' exact words, according to Abdelazeem. Painfully aware of the burden of

the manger's exact works, according to Abdelazers. Painfully aware of the burden of hospital expenses on patients, Ab-delazere no longer withes to work in the hospital. Tam considering tak-ing an ungaid vacation indefinitely. I am biting off more than I can chev, not to mention the fact that no ac-tions were taken in my assult case until now and everyone wants me to behave normally." The situation is less severe in other hospital. Il meetry of Health. In Al-Mouria hospital, all meetical personnel began implementing the decision. However they are warry of speaking publicly about it, since the ministry has sent a warning letter to the hospital admin-

ts crowd at the check up ticket windows of Matariya hospital after the Doctors S

ONLY HALF OF PUBLIC HOSPITALS STARTED ENFORCING THE SYNDICATE ASSEMBLY DECISION UNDER GOVERNMENTAL, ADMINISTRATIVE THREATS

istration to halt the decis Two doctors working in the retu-matoid and ophthalmology clinics, who requested to remain anonymous, told Daily News Egypt the reason this decision is being successfully imple-mented at Al-Mounira is the doctors'

becasion is being successfully imper-benetiad arX-Mourins is the doctors' persistence. "All doctors' here stood up for the decision to refuse to perform any paid cours who did," one of the doctors said. On the other hand, they said the doction increased the doctors said. On the other hand, they said the doction increased the domand on linkins. "Some patients started com-ing for regular checkups, such as eyes sight examinations – never mind the doctors aid. The crowding only intensifies as non approaches the examinations abs. Patients wait in small rooms and outside rooms for their turn. Many of them confirmed to Daily News Epyt that they did not pay extra fees for ide examinations they were about to unergo.

Those two hospitals are among the half of the total 514 public hospitals in the half of the total 514 public hospitals in

Egypt that started implementing the decision, according to the syndicate census

The decision does not teaching hospitals, such as Qasr Al-Eini, although it is one of the largest healthcare facilities in Egypt. Many of its medical personnel are not even aware of the decision. The hospital however operates under similarly dire conditions as those in other pub-

dire conditions as those in other public hospitals. In the corridor of its emergency clinic, massive crowds are seen validing outside, on the benches and on the floor, desperately waiting for nurses to call their mane next. Suffes and loud voices are also heard clearly from suide the clinic, yet no one reacts. Zenab M.a serior woman in tra-ditional rural activity, was sitting one dra the benches in front of the physiother apy clinic waining for her usic daughters. She accompanies her daughters to the clinic three times per week. Her daughter, who recently un-derwark an operation on one of her forms, has been suffering never pain for medical specialists who can improve her conditions at any of the

improve her condition at any of the hospitals near her neighbourhood in Helwan.

"Many recommended Qasr Al-Eini, as it has the specialisation she needs,

but the hospital required EGP 5,500 to perform the operation," Zeinab said.

medical staff, she said they reduced the fees to EGP 3,500, which barely

the feas to EGP 3.500, which harely covers the operation costs. Accord-ing to Zeirab, red valgeter still needs further MRI examination and physio-therapy sessions that she cannot af-ford; not only because of the hospital's tirasme in the because of the hospital's prices but also because of the hospital's further on their home. If the hospital decided to imple-ment the free-of-charge medical treatment decision, demand will defi-tely increase; twill be out of control, said the head of the ophthalmology inic. "Everything here has become costly. Patients pay all expenses for heir medical treatment. Even the family's visitation fees increased from EGP 5 to EGP 10," the said. Constitutional right or legit viola-

nal right or legal violatic

The subsidised – or what is known as free-of-charge – medical treatment has a long legislative history in Egypt; however enforcing it is currently considered a luxury that the main rity of public hospitals cannot afford, due to increasingly low budgets, manpower,

Ehab Al-Taher, is the increase of as-

Doctors Syndicate board member babe Al-Taher, is the increase of as-sults against doctors. "The healthcare ecosystem has a lot to do with assults against doc-tors," he told Daily News Epyt. "When patients find inadegusts ser-increased a doctors right member increased a doctors right member increased a doctors right member and the series of the series of the decision on the first weeks of the decision on the first weeks of the doctors in pleamenting the decision on the first weeks of the doctors in pleamenting the decision on the first weeks of the decision on the first weeks of the decision on the first weeks of the displaray commer members brahim Meihele issued decision. 1063/2014, paratometed the doctors in Dashipta weers referred to the dis-torn of unpleamenting the decision. There prime minister brahim Meihele issued decision 1063/2014, paratement during the first 48 hours for energency cases. The doctions do priced medical examinations during the official working hours at one KPE1

during the official working hours at only EGP I.

Doctors' syndicate published a pa-per which citizens show to hospi-tals personnel. It includes legal ref-erences which guarantee citizens' rinhts to free medical services.

"It is bizarre how the health min-istry is violating the law by threaten-ing hose who abide by it? Al-Taher said. Regarding the decision's conse-quence, which is the increased influx of patients, Al-Taher said: "We ac-cept this burden for the sake of the patients; despits all administrative threats as well." "At the end of the day, it is a so-cieral batte. People should be aware of heir right to access this service for free and speak up for it whenever someone requires them to pay extra money."

Someone requires them to pay extra money." The syndicate published a paper on their websits, which citizans can print and show to hospitals personnel. The paper called "tree medical treat-ment is your right" including a list of the construtional articles and cabinet edistions, which guarance citizens" rights to free medical services. Similar to the cidees paid by citi-aers for other public services such as transportation, the revenues gen-erated from public hospitals are al-located in three directions. The first is the state budget, the second is for a find that enhances services inside nonpitals, and their is for rearrands and incentives to medical personnel. Ministry of Health spokesperion Khaled Megahed toid Duly News Bigs 65 Leave the state 85 "LEAP".

like to leave the state to "starve".

"The state currently seeks expan-sion of investments, tourism, and generally aims to increase its financial resources, not to cut back revenue streams," he said

According to Megahed, free medi-

streams," he said. According to Megahed, free medi-cal treatment is a system already dopted in public hospital, whether through health insurances or the said are very small compared to the services presented. Regarding the surplus fees re-quired for further examinations or operations, Megahed said there are certain prices listed in the code of conduct inside hospitals for each kind of medical examinations our again those prices are trivial com-pared to the services - yet they are indisgeneable resource in the state's budget. "The call to implement a free of charge médical price. The syndiane however did not call for banning this toket, bur rather called for banning the scotbiant money required for there scathistics, Al-Taher said. As soon as the syndicase decided

As soon as the syndicate decided to enforce the decision, the ministry

As soon as the syndicate decided to enforce the decision, the ministry sent illustrative memos to hospitals urging them not to implement the decision, and described doctors who will proceed with it as outdaws. high-lighting potential legislative risks. Testribution instelf a not our goal, but rather ensuring that patients get the right in medical care and find the doctors who provide it." Megabed said. "But if such a decision results in deteriorating the services inside hospitals, due to low budget the min-tery will satter implementing strict legal penalties against doctors who implemented it." The health sector budget remains sufficient main the ongoing chal-lenges. Only 1.5% of the state's GMP, mounting to EGP 2-Dn, was allo-cated towards enhancing healthcare turing fiscal year of 2014-2105;leav-ing only 33 beds available for every 10,000 citizens in Cairo's hospitals.
