

### **Healthcare NGO says Ceftriaxone can be lethal for kids**

The Egyptian Centre to Protect the Right for Medicine (ECPRM) has cautioned against taking ceftriaxone injections without conducting an allergy test. An 18-month-old child from Wadi El Natrun died after taking the ceftriaxone-containing antibiotic Cefaxone 0.5gm injection, according to the ECPRM. The center pointed out that ceftriaxone-based antibiotics include, Wintriaxone, Epicephin, Rocephin, Cefotrix, and Xoraxon.
