

MoH: 3 mn women examined within President's women's health initiative

More than 3.1 million women were examined as part of the President's women's health initiative, launched in July. The Ministry of Health said that a total of 2,716 medical teams are taking part in the campaign, which was rolled out across 20 governorates, indicating that the initiative is targeting 28 million women nationwide. The campaign provides women with treatment and information about breast cancer, obesity, diabetes, and hypertension.
