

**MoH: New campaign to screen pregnant women for HIV/AIDS**

The health ministry's anti-HIV/AIDS program has announced that out of 22,000 estimated HIV/AIDS cases in Egypt, only 16,000 are known to the ministry. The program head attributed HIV/AIDS non-disclosure in Egypt to the fear of stigma or discrimination. The program will launch a campaign to screen pregnant women for HIV/AIDS to make sure that the disease is not passed to the fetus.
