

### **October Pharma to increase production and create new streams of revenue**

In a bid to increase production and create new streams of revenue, October Pharma will manufacture 11 oncology drugs in October after reaching a deal with a German company. The pharmaceutical company also seeks to open a distribution branch in the UAE, to capitalize on simpler registration procedures compared with those of Egypt. October Pharma aims to boost its exports to the GCC countries, Russia, Thailand, Malaysia, and Philippines amid declining revenues due to high production costs in Egypt.
