

ACDIMA subsidiaries to use French, American raw materials to make insulin

Subsidiaries of the Arab Co. for Drug Industries and Medical Appliances (ACDIMA) will use high-quality French raw material to manufacture insulin locally. Medical Union Pharmaceuticals (MUP), a subsidiary of ACDIMA, was the first Egyptian drugmaker to manufacture insulin using active ingredients from the US-based pharma company Eli Lilly. In 2018, MUP produced 10.203 million insulin vials worth EGP 350.148 million.
